AESTHETIC IMPLANTOLOGY: CLINICAL PROCEDURES

January 26 & 27, 2024

Calle San Vicente 8, Edificio Albia I, Floor 13
48001 BILBAO

Achieving optimal aesthetic results in implant therapy is a daily challenge. To ensure predictable results, clinicians must take into account all key aspects of each treatment step: Treatment Planning, Periodontology, Bone Augmentation Surgery, Implantology, and Prosthodontics. In this two-day course, different clinical treatment procedures for the replacement of one or several teeth will be presented in detail.

Day One: Theoretical Course

Friday, January 26, 10:00 - 19:00

- Aesthetics and biological principles in Implantology
- Extraction in the aesthetic area
- Ideal anterior provisional
- Immediate implants
- Placement of implants in combination with GBR
- Soft tissue augmentation and second stage surgery
- Emergence profile management
- Long term aesthetic results

Day Two: Hands-On Workshop

Saturday, January 27, 09:30 - 14:00

- Implant placement workshop with hard and soft tissue augmentation
- Workshop with pig jaws:
 - Subepithelial connective tissue graft
 - Soft tissue augmentation with tunneling
 - Free gingival graft
