

A masterpiece – the MONO torque ratchet

- Made from a solid billet of high-quality titanium alloy
- Can be used in surgery and prosthetics
- No parts to disassemble for cleaning or sterilization
- No maintenance required
- Easy to clean
- Exceptional stability and longevity with consistent precision
- Connects with other implant systems with the use of the short MONO insertion device

reddot design award
winner 2007 – best of the best

MONO circlip

- **Easy assembly**

Mount the MONO circlip over the finger flange of the MONO instrument.

- **Additional safety**

When MONO instruments are used these are additionally secured by the MONO circlip.

- **Easy cleaning and reusable**

The MONO circlip can be autoclaved and is reusable.

The MONO circlip must be replaced if its function starts to be compromised or signs of wear appear (cracks, brittleness).

The MONO circlip is to be used only in combination with the Thommen torque ratchet and the instruments listed below.¹

MONO circlip, Viton

¹ The MONO circlip cannot be used with the MONO screwdriver extra short, as it does not have a PEEK finger rest.

² Q2 = 2 pieces per package

³ The MONO insertion device, short, is compatible with instruments that are provided with a dental latch.
