THE 1ST DASC CONVENTION – A HUB OF SCIENCE INNOVATION & FRIENDSHIP

CONVENTION /kən'venʃn/

Derived from the Latin *convenire*, meaning "to come together," a convention is an event where like-minded individuals gather to connect, share passions, and engage in related activities.

This is exactly what we aim to achieve on **January 11, 2025**. We invite the entire dental community to join us at Zurich's Kraftwerk for the **1st DASC Convention** – a day dedicated to exchange and innovation.

The day will kick off with practical **workshops** and interactive **speed dating sessions**, providing an opportunity to dive into the latest techniques and tools in a hands-on environment. **You can choose between attending a workshop alongside three speed dating sessions or focus on six speed dating sessions** for a concentrated, fast-paced learning experience. These sessions are designed to equip you with new skills and insights that you can immediately apply in your practice.

Following the morning's interactive sessions, we will move into **two main visionary's voice lecture sessions**, where leading experts will discuss forward-thinking topics, from the impact of digital technologies in dentistry to the future of surgical procedures and dental practice management. These lectures aim to provide you with practical, actionable insights to address the evolving challenges in the dental field.

To conclude the day, we invite you to relax and unwind with an evening of entertainment, featuring a DJ set and live concert at Kraftwerk. It's the perfect opportunity to continue the **networking activities** in a nice atmosphere, where you can build lasting professional relationships while enjoying music and great company.

The 1st DASC Convention is set to redefine dental events, offering a unique blend of innovation, collaboration, and community. Don't miss this opportunity to be part of a transformative day of learning and networking.

Marco Zeltner, Samuel Huber, Alexis Ioannidis

Networking is at the heart of the 1st DASC Convention, with numerous opportunities to connect throughout the day. In the small group settings of the speed dating sessions and workshops, you'll collaborate closely with peers, industry and experts. Informal interactions during **lunch** and **coffee breaks** provide the perfect opportunity to discuss insights and meet new colleagues. As the day transitions into the evening, enjoy **dinner** followed by a lively **DJ set, live concert**, and party. These events create a fun, relaxed atmosphere to continue building meaningful professional relationships in a celebratory setting.

In the **90-minute workshop** sessions, participants have the chance to dive deep into the subject matter, get their hands dirty, and learn from the masters. But it's not just about learning concepts—it's about doing and refining practical skills. So, roll up your sleeves and get ready to learn—this is where theory meets hands-on action!

You can choose to book **one workshop and one speed dating session** (covering three topics).

Andreas Bindl: Chairside Restorations: The Latest Updates

Andy Temmerman: "Mastering Palatal Soft Tissue Grafts with Advanced Wound Care

A speed dating session is a 25-minute practical and interactive learning experience designed for small groups. In each of the 2 blocks, **participants rotate through 3 different stations**, exploring a variety of topics with hands-on demonstrations and discussions. Each speed dating gives you the chance to learn specific skills, techniques, or concepts in a dynamic environment that encourages active participation and immediate feedback. Who knows, by the end, you might just think, "**It's a match!**"

You can choose to book either **two speed dating sessions** (covering six topics) or **one speed dating session combined with a workshop** for a well-rounded learning experience.

Luca Golland & Robin Sullivan: Enhancing Clinic Efficiency and Patient Comfort with a Smart Digital Communication System

Sabrina Maniewicz: Streamlining Removable Prosthodontics: A Modern Digital Approach

George Ntefeloudis: Dynamic – Direct – Digital: The 4th Dimension of Visualization

Oliver Schmid: Reimagining Digital Dentistry with Connected Technology

Federico Rivara: Next-Level 3D Printing for Surgical Guides

Stefan Bienz & Franziska Koch: Mouthwash Revolution: Fresh Breath and a Kiss – Right After Surgery

At the 1st DASC Convention, Visionary's Voice features two sessions, each with X dynamic 25-minute lectures, where forward-thinking leaders in the dental field share their insights. These talks aren't just about what's happening now—they're about what's next, pushing the boundaries of innovation in dentistry.

Expect to hear fresh perspectives, learn about new technologies, and walk away with actionable ideas to implement in your practice. **Prepare to be inspired and challenge the way you think about the future of dental care.**

Loic Schülé: New Era, New Challenges: Rethinking Dental Practice Management

Andreas Bindl: Chairside Restoration: Latest Techniques and Trends

Malin Strasding: The Influence of Digital Technologies on Implant Prosthodontics

Roberto Turrini: Discolored Teeth in the Aesthetic Field: Managing Vital and Non-Vital Discolorations Combining Direct and Indirect Restorations

Dan-Krister Rechenberg: The Future of Endodontics: Concepts, Technologies, and Outcomes

Andy Temmerman: Palatal Soft Tissue Grafts: Innovations for Improved Healing and Patient Satisfaction

Federico Rivara: Guided Implant Placement: Achieving Predictable Results in the Aesthetic Zone

Riccardo Kraus: Advancing Surgical Procedures: Merging Proven Methods with Modern Approaches

Ignacio Sanz Martin: Recreating the Natural Soft Tissue Architecture Around Implants: Optimizing Aesthetics and Tissue Stability

Anton Sculean: Recession Coverage in challenging clinical scenarios
